Level of commitment is high. Our team(s) train year round, both indoors on outdoor. When needed, specialist (such as a track coach to work on player's form) will be brought in to assist with the players.

All players returning from injury must be cleared by a physician. Minor injuries such as bumps and bruises do not require this clearance. Any player returning from a concussion must pass a concussion test and are slowly returned to play over a period of time as per Concussion Guidelines.

***While soccer is Important, we believe it has its place in a player's life. In order of importance, we believe a players' family comes first. Their religion is second. Third comes school, all players must maintain their grades. Fourth is soccer.***
